## DynaPulse Pretest Protocols

The following steps are suggested to provide consistent parameters for current and subsequent tests.

- ♥ Notify the staff if you have any health issues limiting or preventing the use of a blood pressure cuff on your left arm.
- ♥ Avoid exercise for 6 hours prior to the test.
- ♥ Be well hydrated. Drink at least 16 oz. of water within one hour of the test.
- ♥ Wear short sleeves that can be easily pulled up the arm, above a blood pressure arm cuff.
- ♥ You will be asked to sit and relax for at least 5 minutes before performing the test.

## Are Your Supplements Decreasing Your Risk of...

- ♥ Heart Attack
- ♥ Stroke
- ♥ Alzheimer's
- ♥ Dementia
- ♥ High Blood Pressure
- ♥ Heart Failure
- ♥ Erectile Dysfunction
- ♥ Kidney Disease
- ♥ Hair Loss / Wrinkles
- ♥ Burning / Tingling / Numb Toes or Fingers
- ♥ PAD / PVD
- ♥ Peripheral Neuropathy?

***\$50\* Test Helps You  
Reduce Your Risk!***

## Should You Be Tested?

You should be tested with DynaPulse if you have a personal or family history of:

- Heart Attack
- Stroke
- High Cholesterol
- Dementia or Alzheimer's
- Hair Loss
- Erectile Dysfunction
- High Blood Pressure
- Kidney Disease
- Smoking
- Diabetes
- Peripheral Artery Disease (PAD)
- Peripheral Vascular Disease (PVD)
- Peripheral Neuropathy

## DynaPulse:

- ♥ Allows early detection of blood vessel wall function, stiffness, blood flow through blood vessels and heart function
- ♥ Monitors blood vessel and heart response to natural vitamin, food, lifestyle, exercise and prescription changes
- ♥ Monitors reduction of your cardiovascular risk factors

The DynaPulse® Analysis Center (DAC), is an Internet-based non-invasive hemodynamic profiler. The DAC offers a simple-to-capture snapshot of the heart's mechanical function and the dynamics of blood pressure and flow within your cardiovascular system.

This test is not meant to be a comprehensive cardiovascular exam, but rather a test to measure blood pressure inside your vessels and the function of your heart and blood vessels. Any blood flow changes or concerns may be diagnosed by the doctor with additional testing.

## Early Detection is Vital

In most cases, with early detection, vascular and heart disease can be prevented or treated effectively. ArterSol is a simple test that may detect these potential problems.

The beauty of the test is that it is very simple. The test does not produce any risk or discomfort and can be done in a matter of minutes.

***Should we find a concern we are available for a consultation\* to recommend a targeted health program that will improve your cardiovascular function and decrease your risk.***

***Call 405-751-3333 to schedule your 15 minute \$50\* DynaPulse test.***

***\* Test price does not include consultation fee.***

***DynaPulse allows you make simple changes to improve your health!***
